

What is New in *STIMPRO 2023 - 10.13.16*

STIMPRO[®] 2023 – 10.13.16, the latest update to StrataGen Inc.'s industry-leading matrix acidizing design and analysis software, is now released.

Our primary aim for this release was to enhance the accuracy and speed of existing modeling functionalities. Additionally, we have integrated three crucial capabilities requested by our diverse user base, ensuring a more comprehensive and powerful user experience.

New Features to Acidizing Model

- Added the capability to model solvent - asphaltene damage reaction and removal
- Added the capability to model produced water scaling tendency
- Added 3D view of the stimulation fluid invasion depth

Fixes

- Fixed and improved acid reaction modeling for sandstone formations
- Improved the modeling of Visco-Elastic (VE) & Self Diverting Acids (SDA) effect
